

# ENVIRONMENTAL SCIENCE (TES)

---

## **TES 199 Intro to Scientific Literature (1 Credit)**

This course covers the foundational format of communicating scientific information. The focus is on practical experience writing and evaluating published primary literature.

## **TES 222 Environmental Law and Conservation Programs (3 Credits)**

This course examines the primary pieces of legislation that affect the environment and wildlife populations. A focus is on conservation programs and incentive programs for landowners. A survey of landownership and public lands is included.

## **TES 410 Environmental Regulations (3 Credits)**

This course provides experience applying federal laws and regulations to environmental issues and compliance with a focus on NEPA and Environmental Assessments.
